

TIME AND ACCURACY MATCH

JULY 16, 2005

Immediately following our regular match.

(This is in place of the previously scheduled two man team match. That match has been postponed.)

In today's match each competitor will take a total of eight shots, two sitting or kneeling, two standing and four prone. Targets will be placed at from 100 to 200 yards.

The match is open to any rifle (no magnums) including rifles with bipods and either iron or optical sights. No AP or steel core ammo allowed. Individuals may fire the course as often as they like. Rifles must be empty with bolts open when moving between positions.

1. **Sitting or kneeling, position 9.** At the signal "TIME" the competitor takes the kneeling or sitting position, loads and takes one shot each at the **two red targets**. After the second shot the competitor immediately moves to position 15.
2. **Standing, position 15.** The competitor takes a standing position, loads and takes one shot each at the two black targets. After the second shot the competitor immediately returns to position 9.
3. **Prone, position 9.** The competitor takes a prone position, loads and takes one shot at each of the **three orange gongs**.

The third shot is immediately followed by one shot at an **orange target which is partially hidden behind a grey gong** at the far right side of the range. This is a feast or famine shot with additional rewards for hitting the orange target and additional penalties for hitting the obscuring grey gong. See scoring below.

Scoring:

The score is the time to make all eight shots plus one minute added for each missed target out of the first seven targets. For the eighth shot on the partially hidden orange target the scoring is as follows: If the orange target is hit without hitting the obscuring grey gong one minute will be deducted from the score. If the grey gong is hit two minutes will be added to the score. If everything is missed one minute will be added to the score. Time begins at the initial signal and ends with the eighth shot.

To assist the competitors the match time keeper will walk each competitor through the course while they shoot it.
